

# OLEKSANDR BRATSIUK

## Senior .NET Full-Stack Engineer

(Backend-focused)

### SUMMARY

Full-Stack .NET engineer (Backend-focused) with extensive experience in designing and implementing web applications, distributed APIs, and data-driven systems using C#, ASP.NET Core, EF Core, MS SQL Server, and solid architectural practices. Strong background in integrations, performance optimization, and maintaining/modernizing complex legacy codebases. Full-stack capable (Angular/React) for UI features and full delivery flows when needed. Brings ownership, clear communication, and experience working across the entire development cycle of enterprise and B2B products.

### SKILLS

#### Backend:

C# (11+ years), .NET, ASP.NET Core, WebAPI, EF Core, LINQ, MS SQL Server, PostgreSQL, REST API, Clean Architecture, SOLID

#### Frontend:

Angular, React, Redux, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

#### Architecture & Patterns:

Clean Architecture, design patterns (factory, strategy, etc.), messaging basics (RabbitMQ), refactoring, performance optimization

### EXPERIENCE

#### Startup Project

Senior .NET Engineer    June – August 2025  
(Contract)

Short-term engineering contract for a fintech MVP (real-time bidding system).

#### Key contributions (concise):

- Implemented backend features using ASP.NET Core, EF Core, SQL Server.
- Added real-time updates via SignalR and RabbitMQ.
- Built several REST API endpoints and small internal React UI prototypes (non-production).
- Integrated Flitt payment workflows.

*Technologies: ASP.NET Core, EF Core, SQL Server, SignalR, RabbitMQ, React.*

Solution Mentors Inc    Senior .NET Full-Stack    November 2020 –  
Engineer (Backend-focused)    October 2024

Worked on **Ecentex Dynamic Case Management**, a large enterprise-grade B2B SaaS platform for workflow and case automation.

#### Key responsibilities & contributions:

- Implemented backend business logic and system integrations in

### LANGUAGES

Ukrainian, Russian - native  
English — Intermediate (B1), progressing toward B2

C# (.NET).

- Improved SQL/Oracle performance: query optimization, indexing, refactoring data-access layers.
- Customized enterprise UI modules using JavaScript/ExtJS; occasionally used React for small experiments and pet prototypes.
- Participated in data migrations (Oracle ↔ SQL Server), ensuring consistency and operational stability.
- Investigated production issues, analyzed logs, identified bottlenecks, and improved reliability.

*Technologies:* C#, .NET, Oracle, SQL Server, JavaScript, ExtJS, React

**ABC Solutions Pro      Full-Stack .NET Developer      August 2018 – October 2020**

Developed two internal B2B systems end-to-end as the primary fullstack engineer.

- Insurance discounts system (**Angular + .NET Core + PostgreSQL**).
- Wholesale order management system (**React + .NET Core**).

**Key contributions:**

- Designed and implemented backend APIs, data models, and business logic.
- Built full-stack functionality end-to-end: UI, API layer, data access, deployment.
- Developed the admin UI using clean React + Bootstrap CSS (no external UI frameworks) based on team requirements.
- Delivered a complete Angular-based front-end for the insurance discount workflow.
- Collaborated with a small team, taking full ownership of assigned modules.

*Technologies:* ASP.NET Core, EF Core, PostgreSQL, Angular, React, Bootstrap

**ITOGO      Senior .NET Developer      December 2017 - August 2018**

Worked on a retail management system with complex dynamic data structures and integrations.

**Key contributions:**

- Reverse-engineered and extended a highly dynamic internal data model by analyzing database structures and workflow logic.
- Developed full API integrations with **Datawiz** and **Horoshop**: API clients, business logic, data mapping, and validation.
- Collaborated with external teams (Horoshop) to clarify API formats and ensure correct data exchange.

- Maintained and optimized backend logic for product and analytics modules.
- Made small UI adjustments using TypeScript, Vue.js, and Kendo UI when needed.

*Technologies:* C#, ASP.NET MVC4, MS SQL Server, TypeScript, Vue.js, Kendo UI

**Inprimex**                   **Backend Developer**                   **November 2015 - December 2017**

Worked on a discounts and purchasing platform with complex multi-level bonus and commission logic.

**Key contributions:**

- Designed database schema and implemented HTTP services using **ServiceStack**.
- Built a multi-level bonus/commission calculation engine (MLM-style): recursive distribution logic across hierarchical customer trees, heavy SQL optimization, and fast upward recalculations for every purchase.
- Optimized SQL queries for processing large bonus structures and upward tree recalculations during every purchase.
- Integrated payment workflows with **Stripe** (API clients, validation, transaction handling).
- Implemented backend business logic and data-processing modules as part of a small engineering team.

*Technologies:* C#, ServiceStack, PostgreSQL, Stripe

**Selected achievements from earlier roles**

**Enterprise systems (financial, telecom, government):**

Designed and optimized large-scale data workflows, SQL logic, and integrations between heterogeneous systems (Oracle, MS SQL, Sybase ASE/ASA, DB2). Worked on high-load, multi-module platforms with complex business rules and strict data consistency requirements.

**Key achievements:**

- **Developed a distributed data replication subsystem** for State Statistics of Ukraine (Sybase CIS), ensuring reliable aggregation and synchronization across regional databases.
- **Built a dynamic validation engine** for the large census project (Sybase SQL Solution): configurable rules, bulk data checks, and UI with real-time highlighting of inconsistencies.
- **Implemented SQL performance improvements** for enterprise reporting and analytical systems in large telecom/retail environments.

- **Integrated data pipelines** between MS SQL Server and Oracle/DB2 to support operational analytics and reporting.

## EDUCATION

### Taras Shevchenko National University of Kyiv

Master's Degree in Economic Cybernetics — Diploma with Honors

## COURSES

*English (GreenForest) — ongoing*
